

AERRL Welcomes OnTrain as its 10th Member

Brussels, 3 April 2025 – The Association of European Rail Rolling Stock Lessors (AERRL), founded in May 2021, is pleased to announce the adhesion of OnTrain, a locomotive leasing platform based in Wrocław (Poland), as its tenth member. This expansion reinforces AERRL's mission to promote a safe, interoperable and sustainable European rail system.

As of the 1st of April 2025, OnTrain has joined AERRL's growing community of rolling stock leasing companies, contributing to the association's efforts to meet the technical, operational, economic, legal and scientific challenges facing the rail transport.

The OnTrain leasing company was launched to offer Central European freight operators a solution for modernising their fleets, and has placed initial orders for 80 electric locomotives. The company is committed to providing high-performance locomotives and comprehensive services that meet the highest industry standards.

Since its foundation, AERRL has grown rapidly and its members now include Akiem, Railpool, Beacon Rail, Northrail, Renfe Alquiler, Nexrail, Cargounit, ELL, RS Lease and finally OnTrain. Together, these members are committed to realising the vision of a single European carbon neutral railway area.

With OnTrain's membership, AERRL continues to strengthen its role of catalyst of competition in the European rail sector and looks forward to working together to promote an interoperable and competitive European rail transport.
